PROFILE

As a web developer, I have a strong foundation in HTML, CSS, JavaScript, and PHP, with a focus on creating user-friendly and visually appealing websites. I have experience designing and developing responsive websites, ecommerce sites, and content management systems. My proficiency in web design and development allows me to create custom websites that are optimized for search engines to improve their overall online presence.

WORK EXPERIENCE

Web Developer

Freelance (Self employed)   2017-2018

- I have developed a lot of projects by freelancing, Some of which are made in python using the django framework with tensorflow that analyzes parking spaces and transmit it to the mobile devices of the drivers. I've also created a e-commerce website named Cacaolavezares.com and still continues to accept small projects on my free time
- Created Applications for local businesses such as Point of sale system and inventory management system

Web Developer

Woebisoft Innovative Solutions   2018-2020

- Along side with universal vision, I have worked as a Freelance web developer for a company which out source customer and handed me the job.
- I have learned a lot working with them and other programmers working on projects
- Created Ecommerce website for a local company

Search Engine Optimization Specialist

Majorel   2022-2023

- I was a Search engine optimization support and specialist for Microsoft Advertising which helps new advertisers optimize their account for maximum conversions and reach of customer.
- I have also improved the system by automating the noting process incase the customer has reached back on a different advocate they will know what went through on the past issue
- I have above passing metrics since the day I was hired which gave me incentives

Web Developer

market role asia pacific inc   2023-2023

- I was a lead web developer for a marketing company
- I was assigned to create a rmtp server and run it on a vps could server on a docker container also deployed kubernetes for load balancing also deployed on the same cloud webhosting a websocket server specifically php laravel websockets for live chat implementation on the live streaming website which is Nacomex.com
- I was also the web developer and SEO specialist for the news website of the company Golasazo.com and Futbolfantastico.com which has reached 1.1k organic traffic within 1 month of my employment and developed it using wordpress I have also developed Plugins for our website due to the niche conten
