SUMMARY

Senior Full-Stack / Backend Web Developer with 7+ years of experience building, scaling, and maintaining production web applications. Strong background in Python (Django/FastAPI) and PHP (Laravel), with hands-on experience designing REST APIs, optimizing backend performance, and deploying cloud-based systems using Docker and Kubernetes. Comfortable owning features end-to-end and collaborating with cross-functional teams to deliver reliable, business-driven solutions.

EXPERIENCE

Web Developer January 2017 - July 2018

Freelance (Self employed)

- I developed a lot of projects by freelancing, Some of which are made in python using the django framework with tensorflow that analyzes parking spaces and transmit it to the mobile devices of the drivers. I've also created a ecommerce website named Cacaolavezares.com and still continues to accept small projects on my free time.
- Created Applications for local businesses such as Point of sale system and inventory management system.

Web Developer February 2018 - April 2020

Woebisoft Innovative Solutions

- Along side with universal vision, As a Freelance web developer for a company which out source customer and handed me the job.
- I learned a lot working with them and other programmers working on projects.
- Created Ecommerce website for a local company.

Search Optimization & Automation Engineer 2022-2023

Majorel

- As a Search engine optimization support and specialist for Microsoft Advertising which helps new advertisers optimize their account for maximum conversions and reach of customer.
- I also improved the system by automating the noting process incase the customer reached back on a different advocate they will know what went through on the past issue.
- I Achieved above passing metrics since the day I got hired which gave me incentives.
- Achieved a 25% increase in client conversion rates by implementing strategic keyword targeting and optimizing ad campaigns through data-driven insights for Microsoft Advertising clients.
